

Swiss precision for excellent audio quality

VOICE TECHNOLOGIES

VT DUO EARPHONE/EARHANGER

The best of both worlds.

In cooperation with monitoring specialist InEar, Voice Technologies created an earhanger headset that combines a perfectly fitting earphone with a high-quality microphone. The engineers at InEar used complex simulations with more than 500 different ear impressions as well as numerous wearing tests to achieve a precise fit to the anatomy of the human ear. This ensures optimum stability and greatest wearing comfort for every user.

The VT DUO combines the custom-style, superb earphone with the earhanger microphone VT901MKII. The result is a set of excellent high-end components that can be used individually as well.

The VT DUO comes in a case with elegant black leather look.

Application area: Broadcast, Stage, Moderation, Skype/Internet/PC

VT DUO EARPHONE/EARHANGER

Specifications:

Earhanger:

Generating Element:	Electret Condenser
Polar Pattern:	Omni-Directional
Frequency Range:	20-20'000 Hz
Sensitivity:	-35dB \pm 3dB 1V/microbar
(17.8mV/Pa)	Color:
Noise Level:	25dB "A" weighted
Max. Input SPL:	125dB
Impedance:	2 kOhm
Bias/+VDC:	0.8-5V

Earphone:

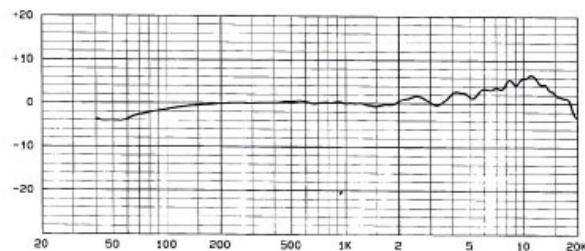

System:	1-way
Frequency Range:	40-17'000 Hz
Output Sound Pressure:	122dB
Impedance:	45 Ohm

Color:	beige
Cables:	Length 1.2m (4.7") \varnothing 1.3mm
Weight:	12g (0.42oz)

Wiring Configuration Earhanger (2-wire):

Red	+ VDC
Copper	Ground

Frequency range:

Standard Accessories

VT701/901
Cable

Ear/Beige

Flexible
Ear Fastener

Standard Packaging

VT DUO Case
