

Swiss precision for excellent audio quality

# VOICE TECHNOLOGIES

## VT710 Aerobic Headset

**You stay in motion. Your voice remains flawless.**

The VT710 of Voice Technologies is the ideal microphone for use by sports and aerobics instructors, television field reporters, singers, entertainers e.t.c. (in noisy surroundings).

The microphone capsule and the flexible boom are sealed for protection from perspiration, rain and dust. An adjustable back band secures the microphone while allowing complete freedom of movement. The flexible boom gives precise placement near the mouth and stays in place during dancing, entertainment and aerobics. For an optimal voice quality the VT710 is molded with highly efficient noise cancelling capsules which prevent interference from crowd noise etc.

**Application area:** Sport- and aerobics instructors - Television field reporters - Singers - Entertainers

## VT710 Aerobic Headset

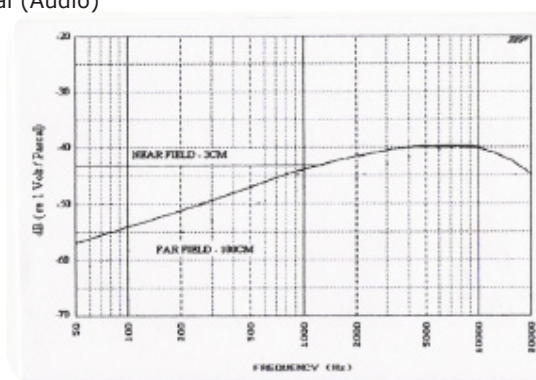

### Specifications:

Generating Element:	Back Electret Microphone
Polar Pattern:	Super Cardioid
Frequency Response:	100Hz-15KHz
Sensitivity (3-wire):	-43dB $\pm$ 3dB 1V/microbar (7.1mV/Pa)
Noise Level:	27dB "A" weighted
Max. Input SPL:	125dB
Impedance:	2-6 kOhm
Bias/+VDC:	1.3-20V
Colors:	black
Cable:	Length 1.4m $\varnothing$ 2mm
Weight:	40g

### Wiring Configuration (3-wire)

Red	"+" BIAS
Silver	Ground (Shield)
White	Signal (Audio)

### Frequency range:

### Standard Accessories

WS710
